Technical Regulation No. 16 concerning delimitation of business sectors for scopes of accreditation for certification of management systems and environmental verification (TF16)

Pursuant to Section 14 (1) of the Danish Act No. 602 of 24 June 2005 regarding promotion of trade and industry, and further to Statutory Order on accreditation of companies for certification of persons, products and systems and for inspection and environmental verification (EMAS) the following provisions shall apply:

Part 1

Delimitation and object

§ 1. This regulation describes rules for delimitation of scopes of accreditation with regard to the types of production and services etc. (in the following called business sectors) within which a certification body certifies management systems or an environmental verifier performs verification according to Statutory Order on accreditation of companies for certification of persons, products and systems and for inspection and environmental verification (EMAS).

(2) The purpose is to delimit each accreditation to the areas, where the certification body or the environmental verifier has documented competence.

Part 2

Business sectors

§ 3. The scope of accreditation is delimited to the business sectors stated in annex 1.

(2) Where the professional, technical competence covers a minor part of the individual business sectors in annex 1, delimitation can be made to a part of a sector. In this case division into NACE codes specified in EC/29/2002 are used – however see (3).

(3) In special cases where NACE codes will lead to wrong delimitations of business sectors, dispensation can be made to the provisions in (2) – however (4) shall be followed.

(4) At accreditation to environmental verification the scope of accreditation shall always be related to NACE codes.

Part 3

Competence

§ 4. Performance of an accredited service within the area of one of the business sectors of the accreditation scope requires special professional, technical competence within the sector and for the specific duty.

(2) The management of the certification body or at the environmental verifier shall be competent to and in praxis perform assessment to verify whether the professional, technical competence is

sufficient to certify or verify a specific companies system, for the activities being performed by the company.

Part 4

Coming into force

§ 22. This Regulation shall come into force on 15 October 2007.

(2) This regulation supersedes Statutory Order 60395 of 13. June 1997 (TF 16).
